

TETRA WIRELINE SERVICES

WIRELINING

ONSHORE AND OFFSHORE E-LINE

TETRA offers a full array of completion and cased well evaluation services, along with open and cased hole pipe recovery through the Wireline Operations of TETRA Offshore Services. While servicing the offshore, onshore, and inland water markets, we provide quality data and expert solutions for the most complex well conditions.

In addition to our comprehensive employee training program, all of our equipment is designed with safety and environmental concerns in mind.

SAFETY **A CORE VALUE**

"At TETRA, there is no job so important nor timetable so critical that we will sacrifice safety or the environment."

Stu Brightman, President and CEO
TETRA Technologies, Inc.

ELECTRIC WIRELINE

Capabilities

Computerized Logging Services

- Segmented cement bond logging
- Gamma ray/neutron correlation logging
- Real-time pressure while perforating
- Satellite data transmission

Mechanical Completion Services

- Through-tubing plugback recompletions
- Plug and packer setting
- Casing and through-tubing perforating

Open and Cased Well Pipe Recovery Services

- Free point determination
- Backoff services
- Audio surveys
- Temperature surveys
- Pipe severing tools
- Jet, chemical, and radial torch cutters

Advantages

- Complete range of cased hole services
- Highly experienced personnel in offshore, onshore, and inland water operations
- Latest, state-of-the-art technology and equipment
- Full compliance with all applicable environmental laws and regulations

PRODUCTION SLICKLINE

Capabilities

- Shifting Sleeves
- Set and Retrieve Gas Lift Valve
- Calipers
- Fishing Operations
- Running/Pulling Plugs
- Cut Paraffin
- Gage Cutter
- Impression Block
- BHP/BHT Memory Gauge
- Locate and Pack Off Holes/Leaks
- Memory Production Logging Tools
- Rigless Subsea Wireline Operations
- Perforating
- Hydrostatic, Dump, and Sand Bailers

FOCUSED ON ENERGY. DEDICATED TO SERVICE.
